## About Symform

Symform is a revolutionary secure cloud storage service. The Symform Cloud Storage Network provides unlimited secure offsite storage and backup for the lowest flat fee. Unlike traditional data center storage, Symform's global network encrypts, shreds and geo-distributes data, providing greater security, higher performance and more cost-effective cloud data storage and backup than any alternative today. Customers join the Symform network by contributing excess local storage and, in exchange, receive affordable, unlimited backup. For more information, contact [info@symform.com](mailto:info@symform.com).
